

Lisbon Metro

Lisbon is a subsea cable connectivity hub. Our carrier-neutral facility is the main provider of data center services in Lisbon

At Equinix, digital leaders are bringing together all the right places, partners and possibilities to create the foundational infrastructure they need to succeed and the Iberian Peninsula is fast becoming an essential hub on the global connectivity map. This is due to its physical location between Africa, Mediterranean Europe and Northern Europe, and its strong cultural connection to Latin America.

Portugal is an important gateway to Brazil and the rest of South America for many European markets. Lisbon is the capital of Portugal and is at the center of industry, government and commerce. It represents an important international connectivity hub, with subsea cables connecting the Iberian Peninsula from Lisbon to Africa and South America.

Our Lisbon (LS1) International Business Exchange™ (IBX®) data center is a business hub for 70+ companies, enabling businesses to build a digital edge alongside the largest industry ecosystems on Platform Equinix®. LS1 has more than 35 carriers providing network connectivity services.

Customers also benefit from direct connections to Gigapix, Portugal's internet peering exchange. Customers include a dense mix of top global networks, cloud service providers, digital content companies and social media platforms.

Equinix can accommodate deployments from single cabinets to large, multi-megawatt installations. We also offer flexible configurations and power densities with resilient power supplies to ensure guaranteed uptime.

Lisbon metro facilities

The Equinix Lisbon data center consists of one building with 16,000+ square feet (1,475+ square meters) of colocation space. This premium facility offers scalable technical space and fully redundant power supplies that deliver leading operational resiliency and world-class security. Powered by 100% renewable energy.
